

Who we are: The Investrain ESG Fund is a student- led Investment group working to use socially-minded investment strategies to maximize impact and increase the prominence of ESG techniques amongst youth investors.

Investment Thesis: Demonstrating the ability to balance investing returns with social good by deploying Socially Responsible Investing in ESG (*Environmental, Social, Governance*) classes of companies.

Mission Statement: The IEF was established with the central focus of balancing investing returns with social good by deploying Investment strategies strictly adhering to ESG (*Environmental, Social, Governance*) factors. Several studies and comprehensive research affirms that ESG investing is highly profitable and performs as well, if not better than, traditional strategies. By enacting stock purchases backed by extensive top-down qualitative and quantitative research, IEF hopes to leverage our capital to further the aforementioned causes and realize the monetary value of responsible investing. On a larger scale, the spread of ESG can change the management strategy of corporations, compelling them to invest their resources in the future of sustainability and social progress.

Structure: The fund currently consists of *17 partners in two groups*. On the business development side, we have several partners who specialize in a variety of disciplines including operations, technology, marketing, and growth. Our talented investing partners have years of trading experience, with specialties in option trading, technical and fundamental analysis, and market research. The commitment of our partners lies in their passion for the advancement of social, environmental, and governance factors in the modern financial environment.

Released 8/19/2020, on the basis of IEF and its respective partners
